Statement from The Town of Aurora

AURORA – There has been much discussion about the proposed residential development on the current site of Highland Gate Golf Club. Highland Gate Developments Inc. has proposed a development of 184 individual lots and a 10-storey condominium building on the site.

Aurora Town Council is not in support of the Highland Gate Development in its current form and believes that there are better options, in terms of design and density, for that site.

As with any development there are several steps in the approval process, including a number of public meetings and consultations that occurred over the course of the last year. Highland Gate Developments Inc. has decided to appeal its proposed development to the Ontario Municipal Board (OMB) prior to Council making a decision on the applications.

Aurora Town Council is willing to attempt mediation with the other parties to try and resolve Council's concerns.
